

RIKIEL KOUAMBENG YOUNDA

FULLSTACK DEVELOPER

Montreal, QC | krikielyounda@gmail.com | [514] -574-8516 | github.com/RIKIEL-K | www.linkedin.com/in/rikielkouambeng

OBJECTIVE

Computer Science graduate with a strong focus on **fullstack development** and hands-on experience in building responsive, accessible, and user-friendly applications. Skilled in UI/UX implementation, API integration, and agile collaboration, I am eager to contribute to innovative projects while continuously growing my technical and professional expertise.

PROFESSIONAL EXPERIENCE

Frontend developer | *Nurun (Publicis Group)*

Montreal, QC | 06/2025 – Present

- Maintained a **TypeScript component library** used to build the frontend of Stellantis websites, collaborating with backend Java teams for REST API integration and actively participating in code reviews in an agile environment.
- Designed and implemented a **TypeScript indexing system** to classify and organize over 20 library components, improving discoverability by 70% and reducing development time for new features.
- Refactored several **legacy components** and enhanced technical documentation on Confluence, facilitating adoption by development teams and reducing integration time by 25%, while managing the development lifecycle with **Bitbucket** and **AWS deployment**.

PROJECTS

Quotation Management Application (Node.js + React) | Academic Project

Montreal, QC | 05/2025 – 08/2025

- Designed and implemented a **full-stack Node.js (Express) web application** to manage quotations (devis) with complete **CRUD operations**, enabling users to dynamically create, edit, and track quotations through a structured workflow.
- Built a **responsive React frontend** with dynamic forms, validation, and CRUD workflows.
- Developed a secure **authentication and authorization system** using JWT and role-based access control (admin, client), ensuring differentiated permissions and restricted views.
- Integrated a **MySQL database**, optimizing SQL queries and implementing **indexes** to improve performance for large datasets.
- Implemented **form validation, error handling, and data integrity checks**, ensuring reliable and consistent user inputs.
- Focused on **frontend performance optimization** and responsive design across devices.

Taxi Booking Application (Java Spring Boot + React) | *Personal project*

Montreal, QC | 05/2025 – 08/2025

- Developed a **complete REST API in Java with Spring Boot**, integrating **Spring Security** for secure authentication and authorization, with user and role management for drivers and passengers.
- Implemented real-time communication via **WebSocket** for live ride tracking and designed the database with **MongoDB** and **Hibernate ORM**, optimizing queries and geospatial data management.
- Created an **interactive user interface with React, JavaScript and jQuery**, integrating **Bootstrap** for responsive design and deployed the complete application on **AWS Cloud ECR**, ensuring scalability and high availability.

TECHNICAL SKILLS

Frontend	Backend	Frameworks	Databases	Tools & DevOps
HTML&CSS	Node.js	Express	MySQL	Docker & Kubernetes
Typescript	Java	React	SQL Server	Git & Github
JavaScript	Python	Springboot	MongoDB	AWS (ECS, S3, Lambda)
		Django		

INTERPERSONAL SKILLS

Bilingual (French & English) | Effective Communication | Teamwork | Attention to Detail | Problem-Solving | Proactivity

EDUCATION

Institut Teccart | DEC in Computer science Option: Web & Mobile Development

Montreal | 09/2023 –08/2025

- GPA: 30.730/50

La prudence College | Baccalauréat

Cameroon | 09/2014–05/2022

- CERTIFICATIONS

- Docker & Kubernetes: The practical guide
 - Ultimate AWS Certified Cloud Practitioner CLF-C02
